

# BioEars

## Product Information

Antimicrobial earplugs for water and noise protection, a revolution in earplug design

Water can be very damaging to the ears leading to ear problems such as Swimmer's Ear. BioEars help to prevent Swimmer's Ear by keeping water out of the ears while swimming or bathing. Antimicrobial product protection keeps the earplugs free of microbes which may lead to earplug degradation and may extend usage\*. BioEars is also very effective as a snore blocker and protects the ears from other harsh noises.

Developed by Cirrus Healthcare Products LLC the makers of EarPlanes, BioEars is the only soft silicone earplug which use **ACTIValoe** a powerful anti-microbial agent.

Offers greater sound protection than other earplugs on the market.  
\*BioEars does NOT prevent or treat ear infections

### How BioEars work

BioEars contain a powerful antimicrobial agent.

The soft silicone plug can be rolled and reshaped to mould to any size of ear forming an airtight seal. Through this design, BioEars are able to block out more noise than conventional wax earplugs.

### Product Features

BioEars are suitable for people who:

- have trouble sleeping
- need to block out the sound of snoring
- who regularly swim and need to protect their ears
- are health conscious
- need to cut out the sound of noise in the workplace

The product is:

- Waterproof
- Reusable
- Suitable for people of all ages
- Comes complete with a polypropylene container
- More comfortable to wear than conventional wax earplugs

Cirrus Healthcare are proud sponsors of Joanne Jackson, Olympic & World Championship medallist.

Joanne uses our BioEars and ClearEars products.
